

Where your plants tell their story

UI/UX Structure and High-Fidelity Wireframes

Page inventory, sitemap, user flows, design system and an annotated wireframe for every page of the platform, on desktop and mobile.

 Monty

Thriving

 Water today · every 7 days

Contents

This document defines the structure and look of every PlantFolio page, so the website can be built page by page with no guesswork about layout, content or behaviour.

FOUNDATIONS

03	UX strategy	Design direction, people and principles
04	Sitemap and navigation	Every page and how they connect
05	Key user flows	Four journeys, step by step
06	Design system: colour and type	Palette, status colours, type scale, layout
07	Design system: components	Reusable interface parts

PAGE WIREFRAMES

08	P01	Landing page	Public
09	P02	Sign up and Log in	Public
10	P03	Dashboard	Logged in
11	P04	My Garden	Logged in
12	P05	Plant Profile	Logged in
13	P06	Add or Edit Plant	Logged in
14	P07	Plant Identifier (AI)	Logged in
15	P08	Plant Health Check (AI)	Logged in
16	P09	Explore and Search	Public
17	P10	Exchange Marketplace	Public
18	P11	Listing Detail	Public
19	P12	Create Listing	Logged in
20	P13	My Exchanges	Logged in
21	P14	Public User Profile	Public
22	P15	Account Settings	Logged in

RESPONSIVE, STATES AND HANDOFF

23	Mobile layouts	Dashboard, plant profile and exchange at 375 px
24	States, modals and feedback	Empty, loading, low confidence, dialogs
25	Build handoff	Page to PHP file to database map

HOW TO READ THE WIREFRAMES

3	Blue numbered callouts are notes, not part of the interface. Each number matches the Key elements list beside the wireframe.
Public Logged in	Who can open the page. Public pages work without an account.
Phase 2	When the page is built, matching the four phases in the project proposal.
Warm style	Which visual style leads on the page: Warm or Functional (see page 3).
garden.php	The PHP file that serves the page on the local XAMPP server.
Continues on scroll	A fade at the bottom means the real page is longer than one screen.
Sample content	Names, plants, numbers and contact details are invented examples. Illustrations stand in for real user photos.

Desktop frames are drawn 1040 px wide and shown at 67%. Mobile frames are 375 px wide.

UX

UX strategy

PlantFolio should feel like a warm community where it shows plants and people, and like a precise tool where members manage care, health and trades.

TWO STYLES, ONE PRODUCT

Warm style

From the "Drew Barrymore" style: welcoming, natural, trust-building

Used on: Landing, Plant Profile, Public Profile and exchange photos

- Cream backgrounds and natural greens
- Lora serif headings, italic scientific names
- Photo-first cards, soft corners and shadows

Functional style

From the "Jensen Huang" style: precise, organised, dependable

Used on: Dashboard, reminders, AI results, forms and tables

- Clear grids and compact rows
- Poppins interface text, strong hierarchy
- Colour only when it carries meaning

Balance

About two-thirds warmone-third functional

Styles not used: the "Steve Jobs" minimal style felt too cold, "Zendaya" too exclusive, "Virgil Abloh" too trend-driven, and "Christopher Nolan" animations would distract from care tasks.

WHO WE DESIGN FOR

TH

Tharushi, 21

Beginner · student in Kurunegala, 4 plants

Wants: keep her plants alive and learn what they are

Struggles: forgets to water; cannot name her plants

Dashboard · Identifier · Plant Profile

DI

Dinesh, 34

Collector · 37 aroids across two rooms

Wants: show off his collection and track each plant

Struggles: care notes scattered across phone apps

My Garden · Plant Profile · Public Profile

AY

Amaya, 27

Swapper · always has spare cuttings

Wants: get new plants without spending money

Struggles: posts get buried in social media groups; no way to judge trust

Exchange · Listing Detail · My Exchanges

All members get the same features; there are no shop or business accounts.

DESIGN PRINCIPLES

1

Plants first. Photos lead every card and profile; text supports them.

2

Care at a glance. Today's tasks are visible on the Dashboard without scrolling.

3

Trust is visible. Ratings, swap counts and confidence scores are always shown.

4

AI helps, you decide. Suggestions need a click to apply; low confidence says "Not sure".

5

Built for phones. Every page works one-handed at 375 px wide.

UX TARGETS TO TEST

< 1 min

to add a plant, from photo to saved profile

1 glance

to see what needs care today, with no scrolling

2 clicks

from a listing to the owner's contact details

5-10

fellow students test the three key journeys unaided

IA

Sitemap and navigation

15 pages in six areas plus the account menu. The top navigation reaches every area in one click; indented pages open from the page above them.

DESKTOP · TOP NAVIGATION (SHOWN AT 62%)

MOBILE · BOTTOM BAR (SHOWN AT 80%)

GLOBAL ELEMENTS

Top navigation (logged in): logo, Dashboard, My Garden, Explore, Exchange, Plant Tools, search, Add plant, notifications, avatar menu.

Mobile bottom bar: Home, Garden, Add (+), Exchange, Profile.

Footer: About, Community guidelines, Contact.

DEPTH RULE

Every area is one click from the top navigation. No page is more than two clicks below its area, and every inner page shows a breadcrumb or a back link.

LEGEND

- Area Top-level navigation item
- Page Needs an account
- Page Public: works logged out
- + AI Uses the Python ML service

UF Key user flows

Four journeys cover the core value of PlantFolio. A, B and C are the journeys in the project proposal; D is the path every new member takes.

A · Add an unknown plant

Tharushi · proposal journey A

Goal: name the plant and know how to care for it

P03
Taps "Add a plant" on the Dashboard

P06
Uploads a photo or takes one with the camera

P06 · AI
Sees the top 3 species with confidence

Decision
Confidence 60% or more?
No: choose the species manually

P06
Checks suggested reminders and saves

P05
Plant profile created, first reminder set

B · Diagnose a sick plant

Tharushi · proposal journey B

Goal: find out what is wrong and what to do today

P05
Opens Tommy's profile and taps Health check

P08
Uploads a photo of an affected leaf

P08 · AI
Waits a few seconds while it is analysed

Decision
Supported species and confident?
No: "Not sure" state with photo tips

P08
Reads the diagnosis and action plan

P05
Result saved to the story; status set to Sick

C · Swap a plant

Amaya · proposal journey C

Goal: trade a spare cutting for a new plant

P10
Browses and filters exchange listings

P11
Reads the listing and the owner's rating

Decision
Logged in?
No: P02 Log in, then return here

P11
Taps "I'm interested"; contact is revealed

Offline
Arranges and completes the swap

P13
Owner marks exchanged; both rate

D · First visit

New member · onboarding

Goal: go from curious visitor to a first plant

P01
Reads the landing page, taps "Start your garden"

P02
Creates an account in under a minute

P03
Sees the empty garden with one clear next step (page 24)

P06
Adds a first plant with a photo

P03
First care reminder appears on the Dashboard

DS1

Design system: colour and type

A small, consistent set of colours and two typefaces carry both styles: Lora gives warmth to names and headings; Poppins keeps controls and data clear.

BRAND PALETTE

P01

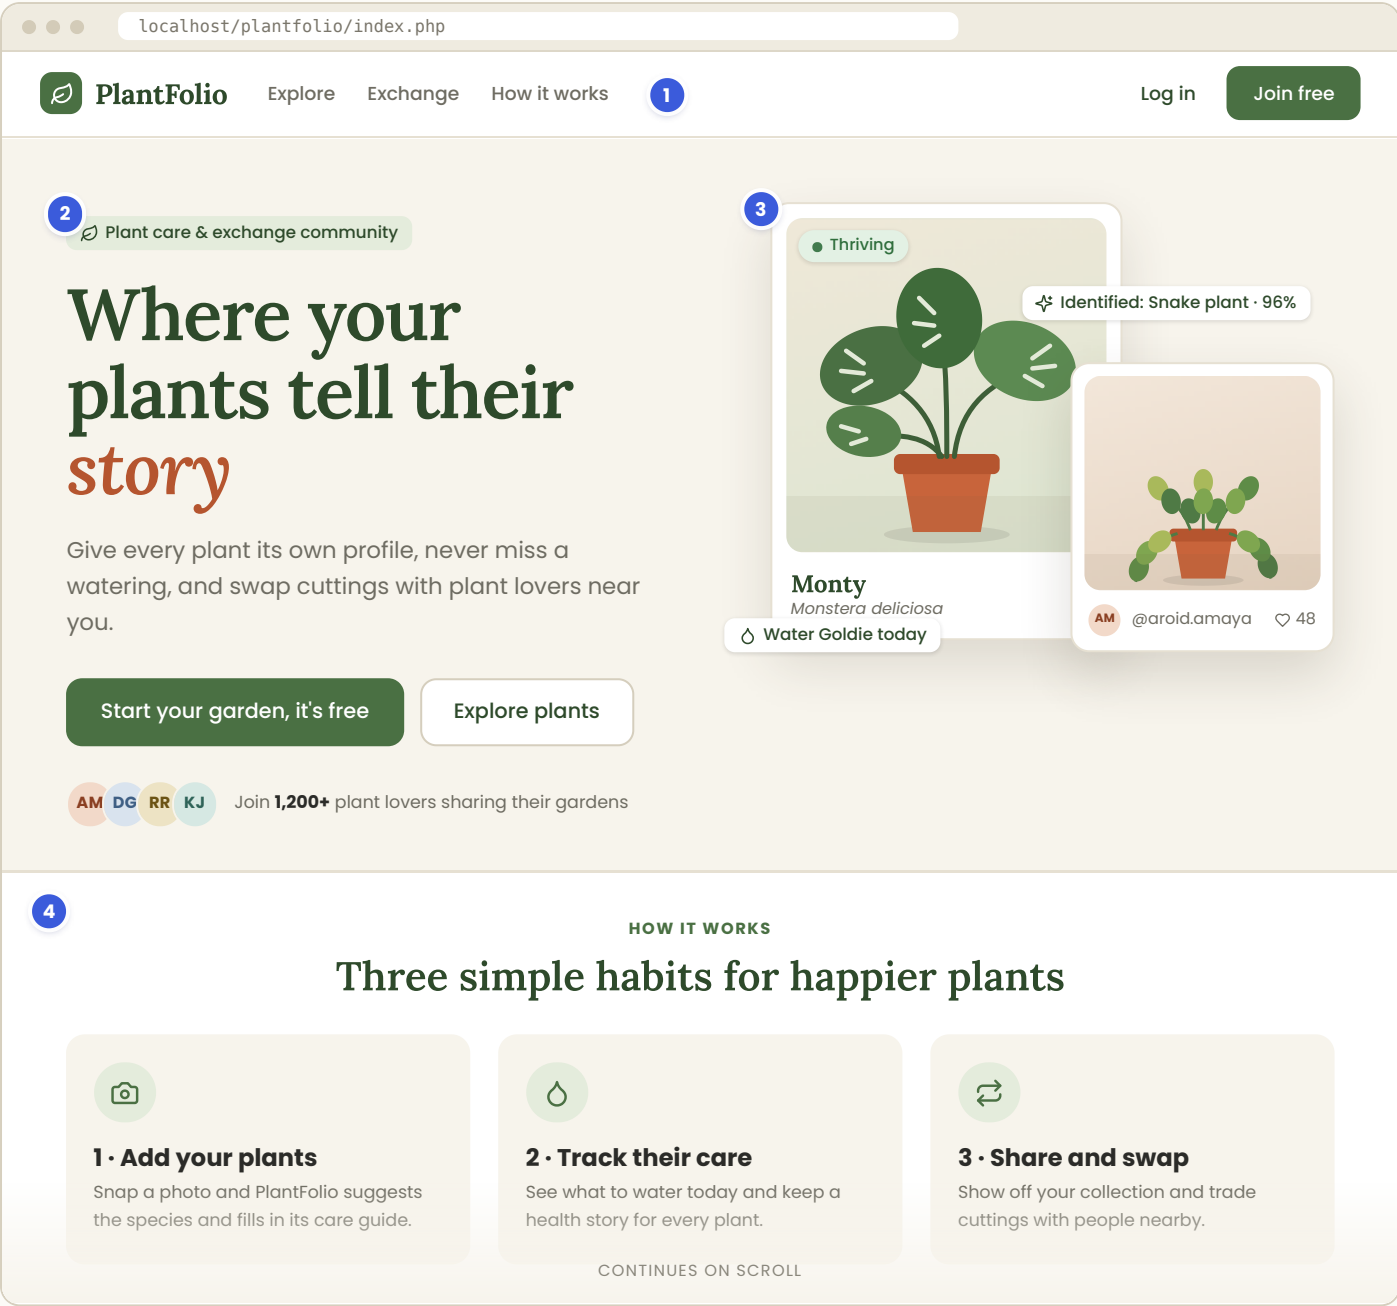

Landing page

index.php

Public

Phase 1

Warm style

- PURPOSE**
- Show first-time visitors what PlantFolio is in one screen and get them to sign up. Logged-in users skip this page and go straight to their Dashboard.
- KEY ELEMENTS**
- 1 **Public navigation** Explore and Exchange can be browsed without an account; "Join free" is the only filled button.
 - 2 **Value proposition** Tagline headline, one-sentence promise, and a single primary action: "Start your garden".
 - 3 **Community collage** Real plant cards, a reminder chip and an AI chip preview the three core features at a glance.
 - 4 **How it works** Three steps that mirror the product: add, track, swap. Short enough to read in 10 seconds.
 - 5 **Smart tools teaser** Introduces plant recognition and disease detection as helpers, not gimmicks.
- UX NOTES**
- Warm style: cream background, Lora serif headings, photo-first cards and soft shadows.
 - Below the fold: "Fresh on the exchange" (4 latest listings), then a footer with About, Guidelines and Contact.
 - Headline counts (members, plants) are read live from the database, never hard-coded.
- DATA**
- users plants (public) exchange_listings

P02

@nimali.grows is available

Email

nimali.p@example.com

3

Password

.....

Strong

At least 8 characters, including a number.

4

Location (optional)

Kurunegala

Helps you find exchange listings near you.

I agree to the community guidelines

5

Create account

Already have a garden? Log in

PURPOSE

One page with two tabs gets new members registered in under a minute and returning members back into their garden.

KEY ELEMENTS

1

Tabs Sign up and Log in share one page, so switching never loses the visitor.

2

Live username check Confirms availability as you type; usernames power @search and profile links.

3

Password strength Four-step meter and one clear rule instead of a list of requirements.

4

Optional location Explains why it is asked; used only for "near you" exchange filters.

5

One primary action Full-width "Create account" button after the guidelines checkbox.

6

Community panel Warm plant photo and a member quote build trust before signing up.

UX NOTES

• Validate each field when it loses focus; show errors beside the field in plain words.

• After sign-up, open the empty Dashboard with an "Add your first plant" prompt (see page 24).

• Log in shows one generic error ("Email or password is incorrect") and limits repeated attempts.

7Exchange activity

DGAMRR4 people are interested in your Pothos cuttings

View interests

- PURPOSE
- The home screen after login. In one glance it answers "What do my plants need today?" and "Is anything wrong?"
- KEY ELEMENTS
- 1Greeting and summary

Personal, dated header with counts of tasks due and plants needing attention.

2Today's care

Reminders due today or overdue, each with a one-click "Mark done".

3Overdue highlight

Red only for overdue tasks; terracotta for due today. Colour always has meaning.

4Needs attention

Plants marked Sick or Needs attention, with the reason and the next step.

5Quick actions

Shortcuts to the four most frequent jobs, including both AI tools.

6Garden at a glance

Plant count and a health breakdown bar across the whole garden.

7Exchange activity

New interest in your listings, linking to My Exchanges (P13).
- UX NOTES
- Functional style: compact rows and clear hierarchy, so the page is scanned, not read.

"Mark done" sets last_done to today and moves next_due forward; a toast confirms with Undo.

Build it first as a normal form POST; add fetch() without page reload later.
- DATA
- care_reminders

P04

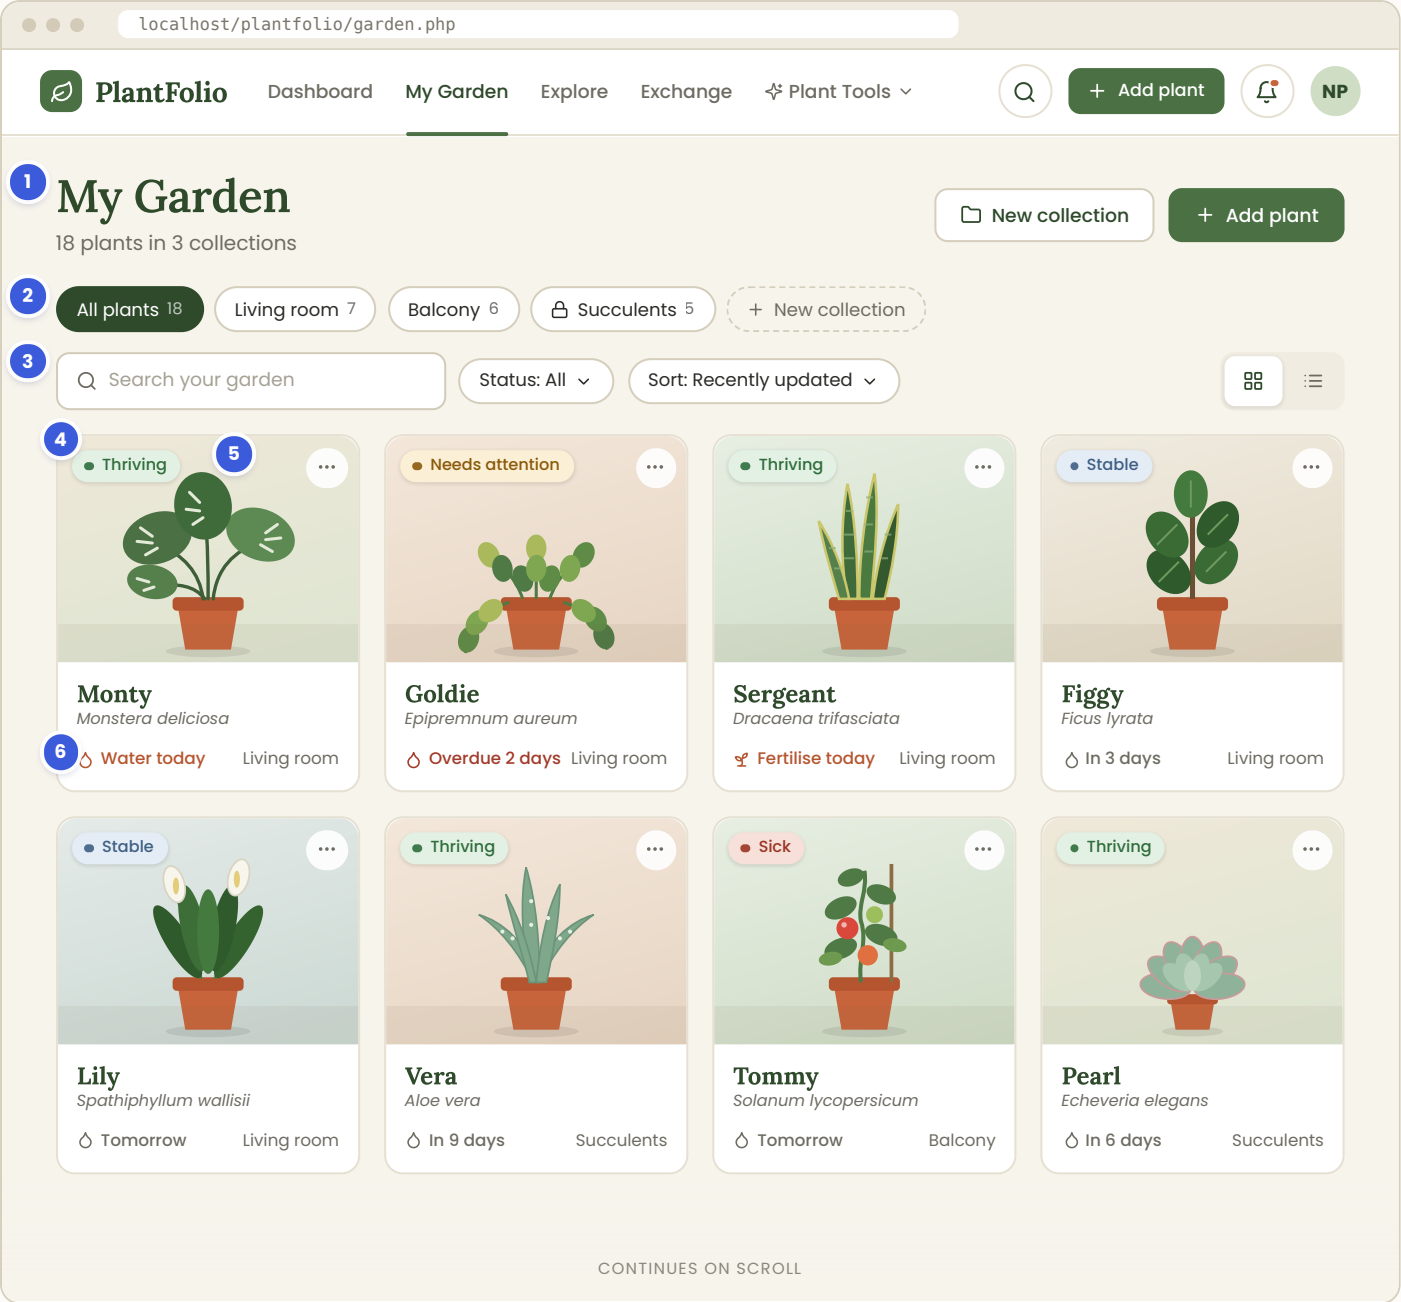

My Garden (collections)

garden.php

Logged in

Phase 1

Warm + Functional

- PURPOSE**
- The user's personal collection: every plant they own, grouped into named collections, with health and next care visible on each card.
- KEY ELEMENTS**
- Header actions** Add plant (primary) and New collection (secondary).
 - Collection tabs** Filter by collection; a lock marks private collections.
 - Search, filter, sort** Find a plant by name, health status or last update; switch grid or list view.
 - Plant card** Photo first, then nickname (Lora) and species (italic). Opens the Plant Profile (P05).
 - Health badge** Same four statuses and colours used everywhere in the product.
 - Next care hint** Shows the soonest reminder; turns terracotta when due and red when overdue.
- UX NOTES**
- Card menu (...): Edit, Move to collection, List for exchange, Delete.
 - List view shows a table (photo, name, collection, status, next care) for large gardens.
 - New users see the empty state on page 24 instead of an empty grid.
- DATA**
- collections plants care_reminders

CONTINUES ON SCROLL

PURPOSE

The heart of PlantFolio: one page per plant that tells its story, with photos, identity, care needs, reminders and a dated health timeline.

KEY ELEMENTS

1

Breadcrumb Shows where the plant lives: My Garden > collection > plant.

2

Photo gallery Large main photo with thumbnails and a quick "Add" tile.

3

Identity and status Nickname, species, common name, health badge and key dates.

4

Primary actions Log update (primary), Health check, List for exchange, and more.

5

Care at a glance Light, water and humidity from the species guide; the next watering is highlighted.

6

Plant story Timeline of updates, photos and AI results, newest first. AI entries carry a sparkle and a confidence score.

7

Reminders card Active reminders with next dates, plus visibility and likes.

UX NOTES

• Visitors see the same page read-only, with an owner card and a like button instead of edit controls.

• Health check opens P08; if the model does not support this species yet, P08 says so instead of guessing.

• Tabs keep the page short: Care guide, Reminders and Photos load on click.

Who can see this plant?

Public · shown in Explore

Private · only you

7

Save plant

Cancel

You can change everything later.

PURPOSE

Adds a new plant (or edits one) in under a minute. A photo comes first so plant recognition can fill in the species and care schedule.

KEY ELEMENTS

1

Photo upload Drag, browse or use the phone camera. JPG or PNG up to 5 MB.

2

AI suggestion Top species with a confidence bar plus two alternatives, each one click to apply.

3

Manual fallback Always available, and the default when confidence is low or the model is offline.

4

Filled-by-AI tag Shows which field the AI filled; clear it with × to type your own.

5

Current health Four-option control sets the first entry in the plant's story.

6

Reminder defaults Intervals come from the species guide and can be switched off or changed.

7

Sticky save bar Save stays visible on long forms; Cancel returns to My Garden.

UX NOTES

The AI never saves silently: nothing is stored until the user presses Save plant.

Edit mode reuses this page, pre-filled, with a "Delete plant" link that opens a confirmation (page 24).

Check file type and size on the server as well as in the browser.

Anthurium andraeanum · Flamingo flower

7%

Aglaonema commutatum · Chinese evergreen

3%

PlantFolio suggests, you decide. When confidence is below 60% we show "Not sure" and ask you to choose the species yourself.

PURPOSE

Answers "What is this plant?" from one photo, using the fine-tuned image model, and hands the result straight into Add Plant.

KEY ELEMENTS

1

Tool switcher Toggle between Identify and Health check without leaving Plant Tools.

2

Photo preview The uploaded photo with Retake (phone camera) and Upload new.

3

Photo tips Four quick rules that improve accuracy before the user even tries.

4

Top match Common name, scientific name, reference photo and a labelled confidence bar.

5

Care and safety chips Light, water and pet safety from the species guide.

6

Add to my garden Opens P06 with the photo, species and reminders already filled in.

7

Alternatives and honesty note Two runner-up species and a plain statement of how confidence works.

UX NOTES

• Show a loading state ("Analysing leaves...") while the ML service responds (page 24).

• Confidence words are fixed: High is 80% or more, Medium 60 to 79%, below 60% is "Not sure".

• Every prediction is stored so accuracy can be measured for the report.

NP

PLANT TOOLS

Plant health check

Upload a photo of an affected leaf. We'll check it for common diseases and suggest what to do.

2

2

Uploaded 30 Sep, 09:14 · lower leaf

Check another photo

7

What this tool can check

Leaf diseases on tomato, potato, pepper, apple, grape, corn and 8 more crops. Houseplant support is planned.

See supported plants

1

Checking a plant from your garden

1

Tommy · Tomato, Balcony

3

Likely disease

Tomato leaf

Early blight

Caused by the fungus *Alternaria solani*

Confidence

High92%

Other possibilities: Septoria leaf spot 5% · Healthy 2%

4

What we see

Dark brown spots with rings, like a target, on older lower leaves. Yellowing around the spots is common.

5

What to do now

1

Remove the spotted lower leaves and bin them. Do not compost them.

2

Water at the base in the morning and keep the leaves dry.

3

Give plants more space so air can move between them.

4

If spots keep spreading, ask a local agriculture officer about a suitable fungicide.

This is a suggestion, not a diagnosis. If more than a third of the plant is affected, get expert advice.

6

Save to Tommy's story

Remind me to re-check in 7 days

PURPOSE

Answers "What is wrong with my plant?" using the disease-detection CNN, then turns the result into clear, practical next steps.

KEY ELEMENTS

1

Plant link

Optionally attach the check to a plant so the result can join its story.

2

Leaf photo

The uploaded image with time and a quick way to try another photo.

3

Diagnosis

Status badge, disease name, cause and a confidence bar with runner-up results.

4

Plain explanation

What the model's result looks like on the leaf, in everyday words.

5

Action plan

Four numbered steps the user can follow today.

6

Save and follow up

Adds the result to the plant timeline and can set a re-check reminder.

7

Scope statement

Lists supported crops so users know when not to trust the tool.

UX NOTES

•

Soft red for disease, never alarming language; the warning box sets expectations honestly.

•

Unsupported species and low confidence show dedicated states instead of a guess (page 24).

•

The model classifies the whole image; it does not draw boxes around spots, so none are shown.

Holey

PURPOSE

Discovery across the whole community: search public plants by name or species, filter them, and find other members by @username.

KEY ELEMENTS

1

Unified search

One box for plant names, species and @usernames. Typing @ switches to People.

2

Plants / People tabs

Result counts on each tab; People lists profiles with rating and plant count.

3

Filter sidebar

Species, health status, location and "available for exchange".

4

Active filters

Removable chips above the results, plus a sort control.

5

Community plant card

Photo, likes, nickname, species, owner and town. Opens the plant (P05, read-only).

6

Matching people

A short row of members related to the search, linking to Public Profile (P14).

UX NOTES

• Search and filters live in the URL (GET), so results can be shared and the Back button works.

• No results: suggest removing the last filter and show popular plants instead of a blank page.

• Only plants marked Public ever appear here.

CONTINUES ON SCROLL

PURPOSE

Where members find plants to swap or take for free. Browsing is public; expressing interest needs an account.

KEY ELEMENTS

1

Listing actions "List a plant" (primary) and "My exchanges" for managing your own swaps.

2

How it works strip The four-step MVP flow, so the rules are clear before anyone clicks.

3

Filters Search, Swap/Free type, distance from your town, species and sort.

4

Type badge Swap or Free on the photo, readable at a glance.

5

Trader rating Average stars and rating count on every card to build trust.

6

Looking for What the owner wants in return, so people only reply with a fair offer.

7

Interest count Shows demand without revealing who is interested.

UX NOTES

• Contact details never appear on cards; they are revealed only after "I'm interested" (P11).

• Closed or exchanged listings are hidden by default.

• Distance uses the town each member enters, not live GPS.

 Safe swapping

Meet in a public place · check the plant before you swap · rate each other afterwards

- PURPOSE**
Gives everything needed to decide on a swap, then reveals the owner's contact details once the user expresses interest.
- KEY ELEMENTS**
 - Photo gallery** Large photo with thumbnails of the actual cuttings.
 - Listing summary** Type, date, interest count, title and approximate distance.
 - Link to the plant's story** Listings made from a garden plant link to its profile, proving its history.
 - Looking for** What the owner wants in return, highlighted in sage.
 - Owner trust card** Rating, number of swaps and member since, with a link to their profile.
 - Interest and contact reveal** State B shown: after "I'm interested", email and phone appear.
 - Safety tips** Three short rules for meeting and swapping.
- UX NOTES**
 - Logged-out visitors pressing "I'm interested" are sent to Log in and returned here afterwards.
 - The owner sees each request in My Exchanges (P13); the requester's own details are not shared automatically.
 - The owner chooses which contact fields are shared when creating the listing (P12).
- STATE A · BEFORE EXPRESSING INTEREST**

Add a short note (optional)...

I'm interested

Your contact is not shared. You will see Nimali's.

AM @aroid.amaya ★ 4.8 (31)	I can offer an Echeveria cutting.	29 Sep	Seen	Mark as exchanged

6★ You swapped Spider plant babies with @amaya.grows on 12 Sep. How did it go?

Rate @amaya.grows

- PURPOSE
- The owner's control room for swaps: which listings are open, who is interested, and which trades still need a rating.
- KEY ELEMENTS
- 1Section tabs

My listings, Interests received, Interests sent and Ratings, each with a count.

2Listing selector

Open and exchanged listings; the selected one fills the table below.

3Interest table

Who is interested, their note, when, and whether the owner has seen it.

4Requester trust

Every row shows the person's rating before the owner replies.

5Mark as exchanged

Closes the listing, records who it went to and unlocks rating.

6Rating prompt

Reminds both sides to rate after a completed swap; opens the Rate modal (page 24).
- UX NOTES
- Functional style: a real table, because owners compare people across the same columns.

Rows are marked Seen when the owner opens the tab; New rows keep a terracotta tag.

Ratings are allowed once per completed exchange, from each side.

"Healthy cuttings, well packed. Easy and friendly swap!"

DG

@dinesh.greens · 14 Sep

PURPOSE

A member's public page (shown as another member sees it). It is their portfolio of plants and their trust record as a trader.

KEY ELEMENTS

1

Identity Large avatar, name, @username, town, member since and a short bio.

2

Community stats Plants, collections, completed swaps and trader rating in one row.

3

Main action Visitors see "See her listings"; the owner sees "Edit profile" instead.

4

Profile tabs Collections, Plants, Listings and Ratings, each with a count.

5

Collection cards A three-photo collage per public collection; private ones are hidden.

6

Rating breakdown Average, star distribution and total, so one bad rating is seen in context.

7

Latest review The most recent written rating, with the reviewer and date.

UX NOTES

• Warm style: cover band, big serif name and photo collages make it feel like a personal portfolio.

• Contact details are never shown on the profile; contact happens through listings only.

• Username search (P09) and every @mention across the site link here.

Show care tasks on Dashboard

Email reminders

Coming later

6

Delete account

Removes your plants, listings and ratings for good.

Delete account

- PURPOSE
- Lets members manage their public profile, password, privacy defaults and reminder preferences in one place.
- KEY ELEMENTS
- 1

Section menu

Jump links to each card on desktop; a list of separate screens on mobile.
- 2

Profile

Photo, display name, username, bio with a character limit, and town.
- 3

Account and security

Password change needs the current password; errors appear under the field.
- 4

Privacy defaults

Default visibility for new plants and approximate location on listings.
- 5

Reminder preferences

Dashboard reminders now; email reminders shown as a later feature.
- 6

Delete account

Kept apart in a red card and always confirmed in a dialog (page 24).
- UX NOTES
- Each card saves on its own, so a password error never discards profile edits.

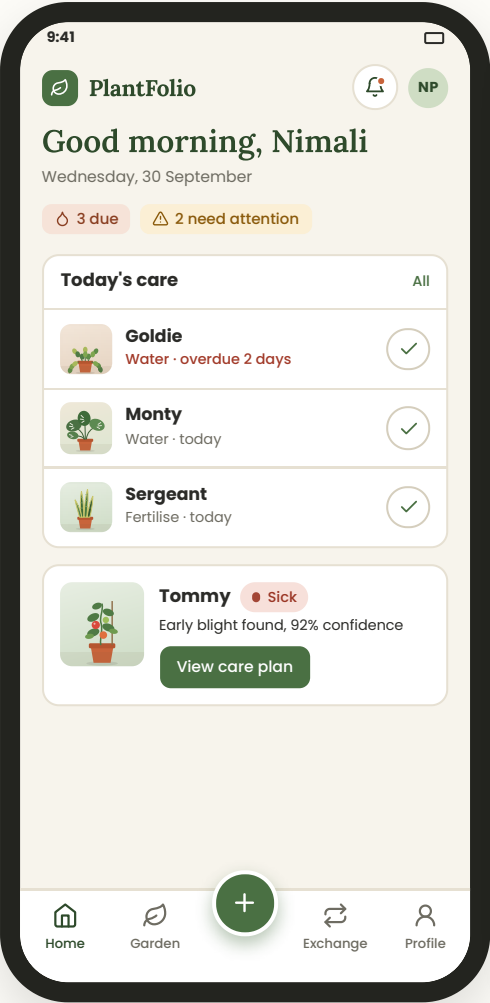

• Changing a username keeps old @links working by redirecting to the new one.

• Upcoming features are shown as disabled with a label, never hidden and never faked.

- users

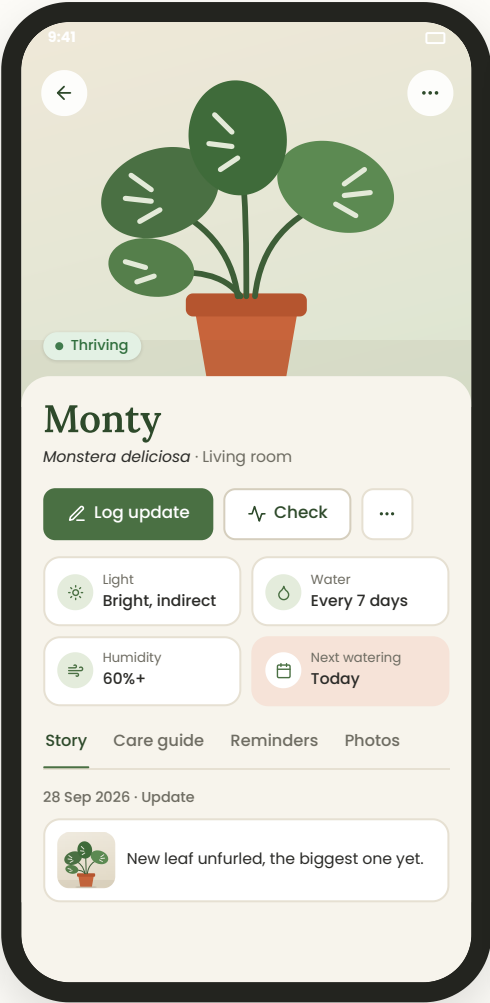

RWD

Mobile layouts

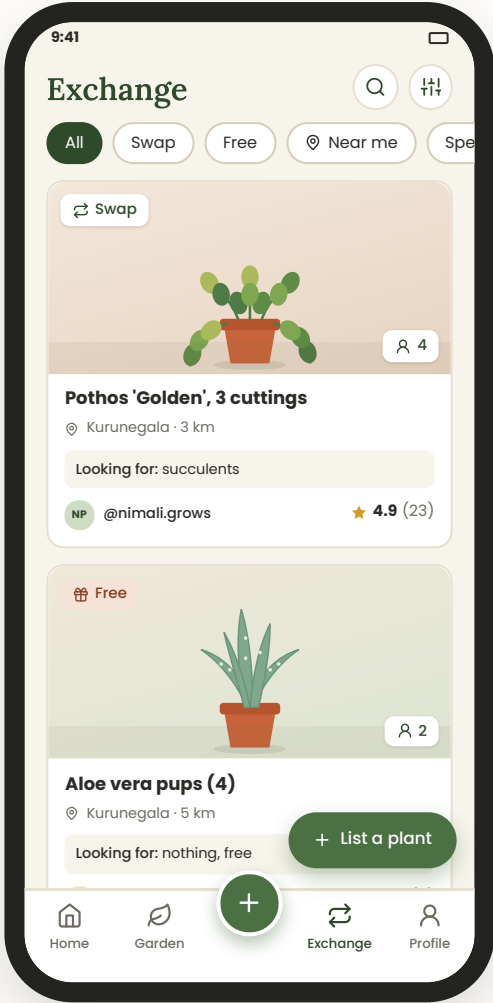

375 px wide

Dashboard · P03

Plant Profile · P05

Exchange · P10

Logged in

Every phase

Both styles

BREAKPOINTS

Desktop 1024 px and up: top navigation, 3 to 4 card columns.

Tablet 768 to 1023 px: 2 card columns; filters collapse behind a button.

Mobile below 768 px: 1 column and a bottom tab bar.

- WHAT CHANGES ON A PHONE**
- The top navigation becomes a bottom bar. The centre + opens Add plant, Identify or Health check.
 - Inner pages such as a plant or a listing hide the bar and show a back button over the photo.
 - Filters open in a bottom sheet; the My Exchanges table becomes stacked cards.
 - Primary actions stay within thumb reach, like the floating "List a plant" button.

- BUILD TIPS**
- Touch targets are at least 44 × 44 px.
 - `<input type="file" accept="image/*" capture="environment">` opens the rear camera directly for plant photos.
 - Write CSS mobile-first, then add `min-width` media queries for tablet and desktop.
 - Test every page at 375 px wide before moving to the next one.

ST

States, modals and feedback

Every page needs more than its happy path. These six states appear across several pages and should be built as shared components.

S1Empty gardenP03 · P04 first visit

Your garden is waiting

Add your first plant to start its story.

+ Add a plant

Identify from a photo

Shown after sign-up instead of an empty grid: one clear next step, plus the AI shortcut. The same pattern covers empty searches and no listings.

S2Analysing a photoP06 · P07 · P08

Analysing leaves...

This usually takes a few seconds.

Cancel

Shown while the Flask service runs the model. Buttons are disabled so the photo is not sent twice; after a timeout the user is offered a retry.

S3Low confidenceP06 · P07 · P08

Not sure · 42%

We couldn't identify this confidently

42%

Try a closer photo of one leaf in daylight, or pick the species yourself.

Retake photo

Choose manually

Below 60% the result is never presented as an answer. The same state is used when the disease model does not support the plant.

S4Rate a traderP13 modal

Rate your swap

Spider plant babies with @amaya.grows · 12 Sep

★★★★☆

Great

Healthy plant and easy to arrange.

Skip

Submit rating

Opens after a swap is marked exchanged. One rating per person per exchange; the comment is optional and appears on the public profile.

S5Log a health updateP05 modal

Log an update for Monty

ThrivingStableAttentionSick

New leaf unfurled, the biggest one yet.

Photo

Save update

Adds a dated entry to the plant story and updates its health badge on every page, including the Dashboard.

S6Confirm and feedbackAll pages

Delete Monty?

This removes Monty's photos, reminders and story. It can't be undone.

Cancel

Delete plant

✓ Watered Monty · next on 7 OctUndo

Destructive actions always ask first, with a red button that names the action. Quick actions confirm with a toast and Undo instead.

DEV

Build handoff

Each page maps to one PHP file and a small set of tables, in the same four phases as the project proposal.

CODE	PAGE	PHP FILE	ACCESS	MAIN TABLES	PHASE	STYLE
P01	Landing page	index.php	Public	users, plants, exchange_listings	1	Warm
P02	Sign up and Log in	register.php, login.php, logout.php	Public	users	1	Warm
P03	Dashboard	dashboard.php	Login	care_reminders, plants, health_logs, listing_interests	1–2	Functional

P14	Public User Profile	user.php?u=	Public	users, collections, plants, user_ratings	1–2	Warm
P15	Account Settings	settings.php	Login	users	1	Functional

REUSABLE PHP INCLUDES

- includes/header.php top navigation and session check
- includes/auth.php require_login() on private pages
- includes/db.php one PDO connection
- partials/plant-card.php used by P04, P09, P14
- partials/listing-card.php used by P10, P12, P14
- includes/flash.php toasts and form errors

ML SERVICE CONTRACT (SUGGESTED)

- POST /predict/species returns the top 3 species with confidence
 - POST /predict/disease returns the top 3 conditions with confidence
- PHP sends the saved photo with cURL to the Flask service and stores the JSON reply in ml_predictions. If the service is offline, pages fall back to manual entry.

NEXT STEPS

- Recreate P03, P04 and P05 in Figma with these colours and fonts.
- Build pages in phase order: P02, P04, P05, P06 first.
- Turn the components on page 7 into CSS classes and PHP partials before building the second page.
- Test each page at 375 px and with a real phone photo.
